

NeuralSeek & eDelta A Strategic AI Partnership

Bringing together decades of industry and regulatory expertise to power future-ready AI decisions.

10 NeuralSeek & eDelta

NeuralSeek and eDelta Consulting are proud to announce a strategic partnership focused on delivering enterprise-grade AI solutions that meet the highest standards of compliance, governance, and operational excellence. Together, we bring decades of expertise across IT audit, regulatory alignment, and AI deployment to support organizations operating in complex, highly regulated sectors such as financial services, healthcare, and government.

At the core of our offering is NeuralSeek—a secure, no-code AI decisioning platform that can be deployed entirely on-premises or within a client’s private cloud. NeuralSeek is built around three pillars:

- 1. Speed:** Clients can deploy and begin iterating on production-ready AI use cases in days, not months. This agility allows business units to innovate quickly while adhering to enterprise-level access controls and audit requirements.
- 2. Simplicity:** NeuralSeek democratizes AI by making advanced capabilities accessible to non-technical users. Compliance, risk, and operational teams can build and manage workflows independently, reducing IT dependencies and enabling real-time governance.
- 3. Success:** Long-term outcomes are built on transparency, traceability, and trust. NeuralSeek integrates with both structured and unstructured data sources and is fully auditable, providing the confidence needed for regulatory reviews and future expansion.

Combined with eDelta’s 25+ years of deep industry knowledge, we offer a powerful, future-ready solution for organizations seeking to adopt AI responsibly, securely, and at scale.

“eDelta complements NeuralSeek

with deep experience in global regulatory compliance, IT audit, and enterprise data governance. Our combined teams ensure every engagement—from initial planning to go-live and beyond—is backed by best practices in both technology implementation and regulatory readiness. We are excited to partner with such a well respected industry thought leader on our objective to create true agentic AI for our customers.”

Marc Martina, CIO, NeuralSeek

“Our joint approach is rooted in

the understanding that no two institutions are alike—particularly when it comes to regulatory expectations, data governance frameworks, and operational risk. Rather than applying a one-size-fits-all model, we collaborate closely with clients to assess their unique needs, current-state infrastructure, and long-term digital transformation goals. From there, we design tailored solutions that accelerate innovation while meeting internal and external audit standards.”

Jon Bosco, Partner, CPA, eDelta
